

2nd Cottenham Cub Group visit to IVCMAC

Impington Village College Model Aeroplane Club has received a request to assist with the cubs attainment of their Model Aeroplane badges.

To this end we have organised a visit for 25 cubs and 3 helpers to one of our regular Friday evening events in Spring 2022.

This will involve the following

The cubs will be split into 3 groups of up to 8 plus a leader in each group. We would then rotate them through the 3 main areas spending half an hour at each.

1. **Free flight rubber powered planes** – We will have some planes they can wind up and launch plus they will see some proper scale models in action
2. **Control line planes** – They will watch some F2b planes doing aerobatics and then have a go with our electric CL trainer plane.
3. **Radio control** – There will be demonstrations of different types plus some parachute dropping where the cubs can help by collecting the parachutes. We also hope to be able to let them have a go with a small powered glider

We will also give each Cub a small BMFA model like the Dart or Aerojet to build after the event under the supervision of Cub leaders.

Assistance requested from the BMFA

1. Funding for the purchase of 30 BMFA Dart models
2. Funding for the purchase of a UMX Radian which will be flown on a buddy box and is robust enough and a suitable size for our field

Note that FF planes and the CL trainer on the day will be provided free of charge by club members.

Costs are £90 for 30 Darts and £110 for the UMX Radian. The UMX Radian will be kept as a club demo / trainer for future similar events.

Total funding request £200
