

Ever wondered why people still fly control line?

Control Line Festival of Flight is your opportunity to give it a go.

We will provide a number of trainers for complete beginners through to competition models plus trimming & expert tuition for the club flyer wanting to improve or just a fun day out with other control line flyers.

**BMFA Buckminster
20-21 June 2024**

<https://control-line.bmfa.uk/>

With the sadly declining interest in aeromodelling in general and in our case control line the tech committee is organising a two day event to promote Control Line.

To be held at Buckminster on the two days preceeding our own CLAPA Championship the event is an attempt to introduce anyone with a curiosity about why we still fly control line to the sport. Manny the Buckminster manager has kindly offered the use of the whole site for two days to promote the event.

There will be a number of basic trainers through to an advanced stunt trainer available to fly.

It is also an opportunity for some of the sports flyers around the country to come and visit the National centre for a control line only fly-in.

If you know anyone who may have an interest please invite them along.

As it is the first year we have run the event the numbers who might attend will be a mystery until the day,. If you are coming to the CLAPA champs and are willing to arrive on Thursday your help would any organisation and assistance in making a success of the event would be much appreciated.
